

Terrorists exploit

operational and physical weak spots

Real advantage comes from knowing how they operate - before they act.

Here are the 7 ways Terrorist
Breach Physical Security

Penetrative:

Ramming at high or low speed to break through.

Deception:

Forged IDs cloned vehicles, or unknowing mules.

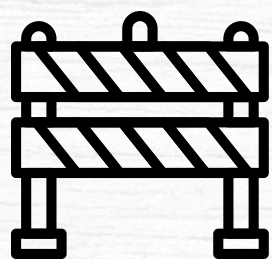

Parked:

Repeated or abandoned vehicles near your site.

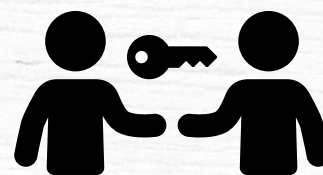

Encroachment:

Vehicles slipping through gaps or tailgating access.

Tamper/ Compromise:

Security barriers weakened or bypassed quietly.

Duress/ Coercion:

Drivers or guards forced to give access.

Insider:

Someone with access helps the attackers.

This is where Critec's **Hostile Vehicle Mitigation Analysis & Design** comes into the picture

We identify **vulnerabilities**, assess the **threat**, and **design bespoke protection**,

because **stopping vehicles isn't just about barriers**, it's about understanding the attacker's playbook.
